

# Ideation Phase

## Brainstorm & Idea Prioritization Template

Date	19 September 2022
Team ID	PNT2022TMID09674
Project Name	Project - Crude Oil Price Prediction
Maximum Marks	4 Marks

### Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

### Step-1: Team Gathering, Collaboration and Select the Problem Statement

## Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

🕒 10 minutes to prepare  
🕒 1 hour to collaborate  
👤 2-8 people recommended

**Before you collaborate**

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

- Team gathering**  
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.
- Set the goal**  
Think about the problem you'll be focusing on solving in the brainstorming session.
- Learn how to use the facilitation tools**  
Use the Facilitation Superpowers to run a happy and productive session.

**Define your problem statement**

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

**PROBLEM**

How crude oil price can be predicted? what are the ways to predict and what are the impacts?

**Key rules of brainstorming**

To run a smooth and productive session

- Stay in topic.
- Encourage wild ideas.
- Defer judgment.
- Listen to others.
- Go for volume.
- If possible, be visual.

### Step-2: Brainstorm, Idea Listing and Grouping

2

**Brainstorm**

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

**Sree Kayathri**

can be predicted using the raw data	artificial intelligence can be very effective in prediction	sampleings and records are useful for prediction

**Priyadharshini**

deep learning can be used for analysis	history of prices can be used for references	the integration of AI and machine learning will be useful

**Rajasimman**

Python can be used to represent the ideas	Visual representation can be done to get a better idea about the data	Clear information should be gathered to implement the model

**Niranjana**

Price prediction can be done by go analyzing the data from different time period	The overall results can be recorded and can be used for the prediction	Professionals can be really helpful in gaining knowledge about the crude oil prices

3

**Group Ideas**

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

🕒 20 minutes

**Basic level**

can be predicted using the raw data	artificial intelligence can be very effective in prediction	sampleings and records are useful for prediction
-------------------------------------	---	--

**Advanced level**

deep learning can be used for analysis	history of prices can be used for references	the integration of AI and machine learning will be useful	Python can be used to represent the ideas	The overall results can be recorded and can be used for the prediction	Professionals can be really helpful in gaining knowledge about the crude oil prices
Price prediction can be done by go analyzing the data from different time period	Visual representation can be done to get a better idea about the data				

**Step-3: Idea Prioritization**

## Prioritize
